As High as an Elephant's Eye

The portion of this year's U.S. corn crop going to ethanol may surpass the amount used in feed for the first time. Federal subsidies for ethanol production, due to expire at the end of 2011, have spurred corn demand and pushed up prices, to the dismay of livestock farmers. —*Alan Bjerga*

- Bushels used in ethanol
- Bushels used in feed
- Average price per bushel
